Lance K. R. Berg, P.Eng.

Board & Strategic Adviser profile

Board & Strategic Adviser · Energy Executive · Professional Engineer

CHALLENGE

Technical and COO-level energy leadership needed a Board Profile that translated asset, capital and operational scale into governance-relevant value for boards and executive teams.

ASSESSMENT

Operating evidence was substantial; the reading required board-relevant value highlights, skills for oversight and a calm Board Profile rather than a dense technical CV alone.

APPROACH

Structured a Board & Strategic Adviser profile: board profile narrative, value highlights, skills architecture, professional experience and board/community service — oriented to capital allocation, risk oversight and stakeholder alignment.

OUTCOME

Deliverables: Board profile and strategic-adviser positioning materials. No board appointment is claimed by this engagement summary.

This document describes positioning deliverables produced by VisionSpark Advisors (Joel Facco). It does not claim interviews, placements, Board appointments or employment outcomes. Career advisory remains separate from recruitment consideration.
